BRUTUS ROBUST BUT INVITING TO BRING US CLOSER TOGETHER

Discover Brutus, an eco-conscious bench collection that epitomizes the perfect fusion of sustainability and style. Brutus firmly holds its ground with a robust base crafted from 100% recycled household plastic, showcasing our commitment to environmental responsibility.

The bench features a classic and elegant design, utilizing bamboo – a timeless material known for its durability and aesthetic appeal. Choose from options with or without a backrest to suit your preferences. Moreover, Brutus offers the flexibility to seamlessly pair with the Torben table, providing a cohesive and stylish ensemble for your space.

Join us in embracing sustainability without compromise – each piece in the collection is crafted from recycled household plastics, offering not only comfort but also a step towards a more sustainable future.

BUDDY THE PERFECT PICNIC EXPERIENCE

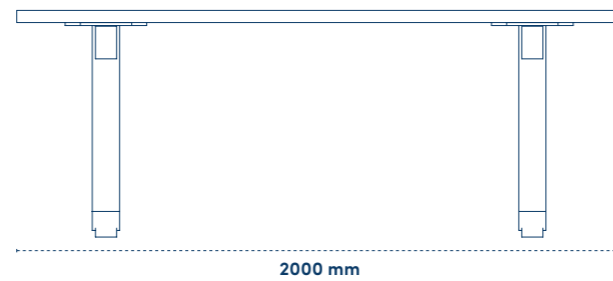

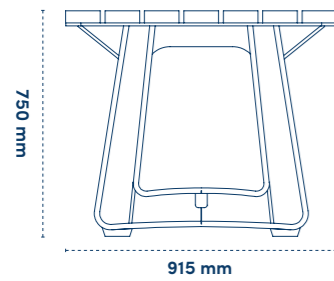

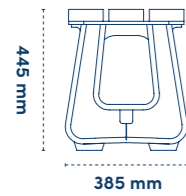

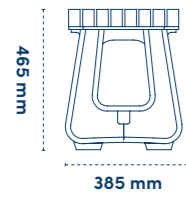

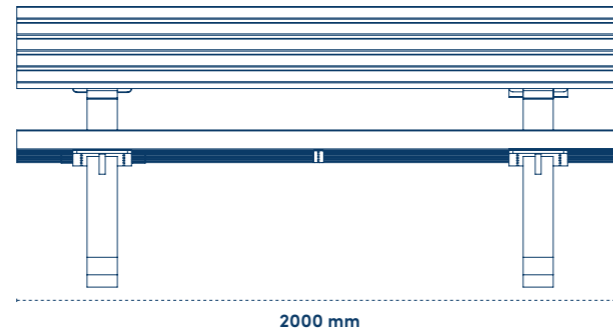

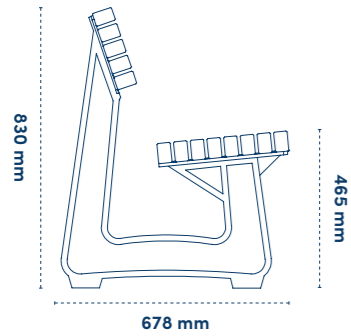

Step into the world of outdoor conviviality with Buddy, our thoughtfully crafted set for the ultimate picnic experience.

Buddy brings people together, combining the elegance of a table with the comfort of benches to create a harmonious ensemble. Crafted with our commitment to sustainability in mind, Buddy's base is made from 100% recycled household plastic. The sturdy base is complemented by a bamboo top that adds a touch of natural elegance while providing a durable, weather-resistant surface for outdoor gatherings.

Bask in the joy of nature with Buddy, your perfect picnic companion. Its robust recycled plastic base ensures stability and longevity, while the bamboo top embodies style and environmental consciousness. Buddy invites you to enjoy the outdoors in comfort, bond over meals or drinks, and create unforgettable memories. It embodies sustainability and convenience, setting the stage for delightful picnics while keeping the environment in mind.

MEASUREMENTS

MATERIALS

BENCHES

The seating of the Brutus benches and the top of the Torben table are made from bamboo, treated with a water resistant coating. Bamboo ensures that the seats feel warm and soft, for optimum seating comfort. It is flexible, solid and pleasant to touch. It will age in its specific way.

The base consists of 100% recycled plastics. So it could be that you once drank from a bottle of which this bench is made.

R2 THE FUTURE PROOF LITTER BIN FOR PUBLIC SPACES

Introducing the R2, Travenues innovative litter bin for effective waste management. Seamlessly fusing functionality and aesthetics, the R2 is a customizable masterpiece, offering diverse sizes and options that transform public spaces.

Crafted with sustainable innovation, it boasts recycled and recyclable materials, from its top cover made of repurposed plastics to its cast aluminum housing manufactured with recycled content.

Coated for durability and weather resistance, the R2 stands as an eco-conscious urban essential.

Uniting futuristic design with environmental commitment, R2 by Travenue is where waste finds a stylish, sustainable home.

DESIGN: GENTILE & MORE

RECYCLING

OPTIONS

You can personalize the R2 with a logo and several different insertion options such as:

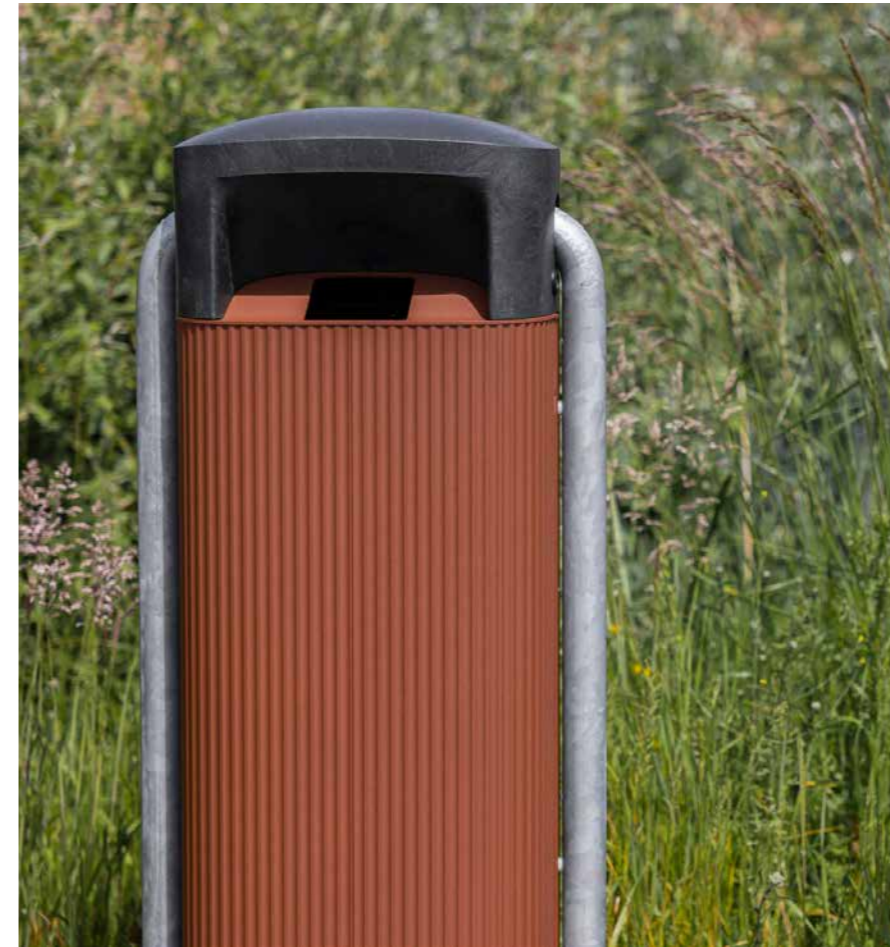

- stainless steel ashtray
- can insert plate
- intermediate strip
- shut-off valve

You can have an insert opening on 1 side or 2 sides (front and rear waste bin).

Other options are a fill-level sensor or an indicator to be collected.

The insert opening can always be adjusted afterwards.

In addition to insertion options, you can choose between an R2 with a bag holder or without, where the inner bin becomes optional.

MATERIALS

The R2 is made of recycled materials and is 100% recyclable.

The top cover is made from recycled plastics.

The housing is made of cast aluminium (extrusion) panels consisting of recycled aluminium.

Standard equipped with anti-sticking lines. The panels are coated with high-quality UV and weather-resistant powder coating or anodised.

WALLY READY TO POINT YOU IN THE RIGHT DIRECTION

WAYFINDING

In the bustling urban tapestry, Travenue proudly presents the innovative Wally wayfinding signage. These signs are your steadfast allies, ready to guide you seamlessly through the urban maze. Designed to effortlessly integrate into any streetscape, the Wally pennants offer a sleek and unobtrusive solution to urban navigation.

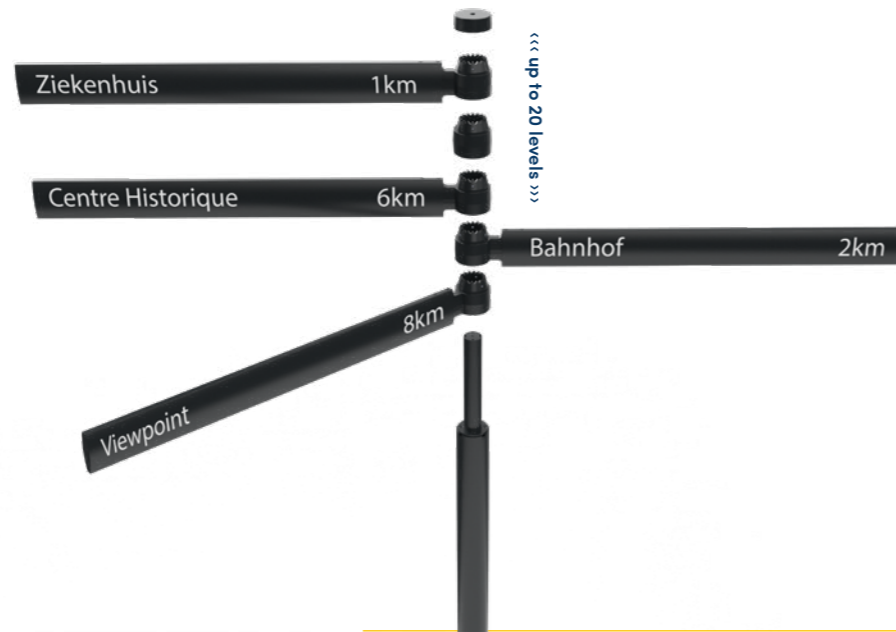

OPTIONS

You can personalize Wally in many different ways such as

- arrows in different colours
- letters in different colours
- layout
- symbols
- walking distance
- walking time

The top cap can be in a different colour (for example, to indicate that zone of a city).

The length of the pennant is standard 800mm, but can also be shorter.

MATERIALS

Wally is made entirely from sustainable and recycled materials.

The pennants are made from recycled aluminium which is a composite of diecast aluminium and extruded aluminium.

It has a steel pole with galvanization.

The whole ensemble is finished with powder coating in a standard RAL colour of your choice.

RECYCLED ALUMINIUM

STEEL

INSTALLATION

As standard, the pole is permanently concreted on-site, but can also be provided with a base plate for ground-level mounting, for mounting below ground level, or can be placed in a removable base.

PROTECTING STREETS. RESTORING NATURE.

STEDDY SUSTAINABILITY THAT STANDS STRONG

Meet the new **biobased diamond-head bollard** – a breakthrough in sustainable urban design.

Developed by **Trafiroad** in collaboration with **C-Biotech**, this innovative bollard is made from recycled HDPE, post-consumer waste and locally grown industrial hemp.

Its unique composition doesn't just minimize carbon emissions – **it actively removes CO₂** from the atmosphere. By harnessing the natural carbon-capturing power of hemp, this bollard goes beyond neutral to become **CO₂-negative**, helping cities reduce their environmental footprint in a measurable way.

Designed and produced entirely in Belgium, the biobased bollard proves that ecological responsibility and economic logic can go hand in hand. Fully circular and traceable through the Earth Plus platform, it replaces tropical hardwood **without compromising on strength, aesthetics or functionality.**

Available in **fixed** and **removable** versions compatible with standard sockets.

The lightweight diamond-head bollard sets a new standard for sustainable street furniture.

Steddy combines:

- durability
- safety
- smart design
